Section 17: Client image upload

1 / 16 | 1hr 39min

- ☒ 191. Introduction
 - 2min
- ☐ 192. Creating a profile page
 - 5min
- ☐ 193. Adding a profile header
 - 6min
- ☐ 194. Adding the profile content
 - 4min
- ☐ 195. Getting the profile data
 - 5min
- ☐ 196. Getting the profile data part 2
 - 5min
- ☐ 197. Displaying the photos
 - 6min
- ☐ 198. Conditionally rendering the photo widget
 - 6min
- ☐ 199. Creating a photo upload widget
 - 4min
- ☐ 200. Adding a Dropzone
 - 4min
- ☐ 201. Styling the Dropzone
 - 9min
- ☐ 202. Adding a react cropper
 - 14min
- ☐ 203. Adding the photo upload method
 - 11min
- ☐ 204. Setting the main photo
 - 8min
- ☐ 205. Deleting photos
 - 7min
- ☐ 206. Summary of section 17
 - 2min

- **When the user changes their main photo, then navigates back to the activities the host and attendee images are not updated. Is this a bug?**

I prefer to refer to this as a “not implemented feature”. You know how to update state in the store, you also know how to loop over arrays and update elements in arrays and have the react components react to this change. Consider this a small challenge to implement this if you want to add it.

Note: Not all apps will update lists immediately when a user changes something due to the performance gains from caching.
